

Math Matters & Reading Rocks

St. Luke's Church 918-766-4441 24th St & 2nd Ave Next to Central Elementary

A NEW COST-FREE tutoring program is now available to elementary students in Kearney.

Getting ahead in math and reading is the best foundation for every other academic skill.

To help more students get that foundation, Saint Luke's has a new weekly program of tutoring in math and reading every Wednesday after school, taught by members with bachelor's and advanced university degrees.

The schedule would look something like this:

20 min. recreation and snacks (provided by us)

3 min. gathering/transition song

30 min. of tutoring

15 min. of movement

1 to 3 min of silence

30 min of tutoring

3 min. closing song

Following the program, students may be picked up by their parents at 5:30 pm or freely join our regular Wednesday night family meal before they go. [Email: StLukes@rcom-ne.com](mailto:StLukes@rcom-ne.com)

Program begins at 3:30 pm. and concludes at 5:30pm. Optional dinner begins at 5:45 pm.

About our staff

Tina Baker, a member of the UNK Education Department faculty and our lead in this project, has materials for testing the level of math and reading readiness in which each child can successfully perform. That is where we will start. She also has the resources to test the children's progress at the end of the school year to measure the success we hope to see.

Safety Training

All of our volunteers have successfully completed a 3 hour course in Safeguarding Children an outstanding program for raising awareness to the frequency of inappropriate behavior, the boundaries that must be in place to discourage predators, and policies and procedures that overcome logistical vulnerabilities and reduce opportunities for abuse.
